[LinkedIn profile](#)

Software Engineering student from Chad, based in Kigali, with experience in software development, machine learning, client work, field research, and student leadership. Software engineering is my foundation, machine learning is a growing strength, and I am working toward a career that combines AI engineering with research. I care most about useful and accessible technology for healthcare, agriculture, and education.

EXPERIENCE

Founder and Lead Developer

2025 to present

Independent Web Development Practice

- Completed more than fifteen paid web, application, portfolio, and design projects alongside full-time study.
- Handled requirements, planning, design, development, delivery, and handover. Coordinated a team of four for larger work.

Machine Learning Intern

2025 · Remote

CodeAlpha

- Built a financial inclusion project using 23,524 East African survey responses, compared four models, and created a Streamlit interface.
- Built a speech emotion recognition pipeline using CNN and LSTM approaches with speaker-separated evaluation.

Field Research Consultant and Web Developer

2025 · Rwanda

Afrifarmers Market

- Spoke with around thirty cooperative members in Rwamagana District and turned their daily operational needs into product requirements.
- Delivered a consultancy report, then received a follow-on contract to build an operations and transaction tracking application.

Data Analysis Intern

2024 · Rwanda

MTN Mobile Money

- Processed Mobile Money transaction records stored in XML with Python and built a dashboard for non-technical colleagues.

Agricultural Field Worker and Operations Trainee

2019 to 2023 · Chad

Family Farming Business

- Worked across farm sites in land preparation, tractor operation, harvests, farmer relationships, management, and commercial negotiation.

SELECTED PROJECTS

Malaria Diagnosis Study

Compared five image models under one evaluation setup. My baseline CNN reached 0.9647 F1 and 0.9938 AUC on a 5,512-image held-out test set.

HealthBridge Africa

Healthcare prototype designed around mobile, web, and USSD access, with separate AI support for clinicians and patients.

Rice Leaf Disease Classifier

Deployed four-class crop disease tool with about 89% held-out accuracy, retraining support, monitoring, and a simulated 50-user scaling test.

EDUCATION

BSc (Hons) Software Engineering

African Leadership University

Kigali, Rwanda · June 2024 to expected July 2027

CGPA: 4.14 / 5.00

380 of 380 attempted credits earned on the August 2026 transcript.

TECHNICAL SKILLS

Software and web: Python, JavaScript, TypeScript, React, Next.js, Node.js, FastAPI, NestJS, Flask

Mobile: Flutter, Dart, Firebase, Firestore

Machine learning: TensorFlow, Keras, scikit-learn, computer vision, prediction, clustering, time series

Data and delivery: SQL, PostgreSQL, MySQL, Docker, Git, Linux, Nginx, REST APIs, GitHub Actions

LEADERSHIP AND

ENTREPRENEURSHIP

- Founded the AI Study Lab, which grew from twelve to more than thirty students across Chad, Cameroon, and Rwanda.
- Supported more than ten students who later joined ALU, the University of Rwanda, and CMU Africa, and advised more than twenty others.
- Ran a self-funded natural juice business in N'Djamena before university.
- Placed second at the 2026 Claude Builder Club Hackathon at ALU.

CURRENT DIRECTION

I am developing toward AI Research Engineering, where I can study meaningful problems and turn sound ideas into reliable software.

PeerForge

Full-stack collaboration environment where computer science students can find projects, form teams, discuss ideas, and show their work.

Productivity Tracking and Analytics

Cross-platform Flutter app that runs clustering, forecasting, and rule-based pattern analysis on the user's device.

My long-term goal is to establish the Beral Research & Technology Institute, an African organisation for research, useful technology, entrepreneurship, and the training of future researchers and engineers.

CERTIFICATIONS

- Neural Networks and Deep Learning, DeepLearning.AI
- Linear Algebra for ML and Data Science, DeepLearning.AI
- Flutter and Dart for Mobile Apps, IBM
- Data Analysis with R Programming, Google
- Claude 101, Anthropic
- AI for Everyone, DeepLearning.AI
